RE: COMMUNITY SECURITY REMINDER

Dear Residents,

As part of our ongoing commitment to maintaining a safe and secure community, we would like to remind all residents of several security and compliance measures currently in place or under review.

Access Control

- All residents are required to use their assigned access fob when entering through the East pedestrian gate.
- Individuals without an access fob must enter through the West pedestrian gate and may be subject to additional verification procedures.

Resident Identification

- To assist security personnel in verifying resident access, resident photographs may be maintained at the gatehouse.
- Security staff may request identification from individuals who are not readily recognized.

Pet Registration

- All dogs residing within the community must be registered with the Management Office.
- Residents are encouraged to ensure that registration information remains current and accurate.

Service and Support Animals

- Residents with service or support animals should ensure that security personnel can readily identify such animals.

Parking Enforcement

- Vehicles parked in designated 15-minute parking zones beyond the permitted time limit may be subject to booting or towing in accordance with community regulations.
- The commercial parking lot is reserved for authorized use only and may not be used by residents for routine parking.

These measures are intended to enhance community safety, improve access control, and assist our security team in serving residents more effectively.

Should you have any questions regarding these policies, please contact the Management Office.

Thank you for your cooperation.
